- (57) Sammendrag:  
**A method for positioning a tube under a floor surface using a footwear is disclosed. The method comprising the steps of: providing a tube positioning outsole, aligning the arcuate section over the tube, gripping an outer surface of the tube using the arcuate section of the tube positioning outsole, and positioning the tube for installation of the tube under the floor surface. The method comprising the steps of providing a tube positioning outsole, further comprises an outer surface, and an arcuate section positioned generally equidistant from a heel section and a toe section of the footwear.**
